

4-6E Let's search PubMed Medical, Life Science Fields

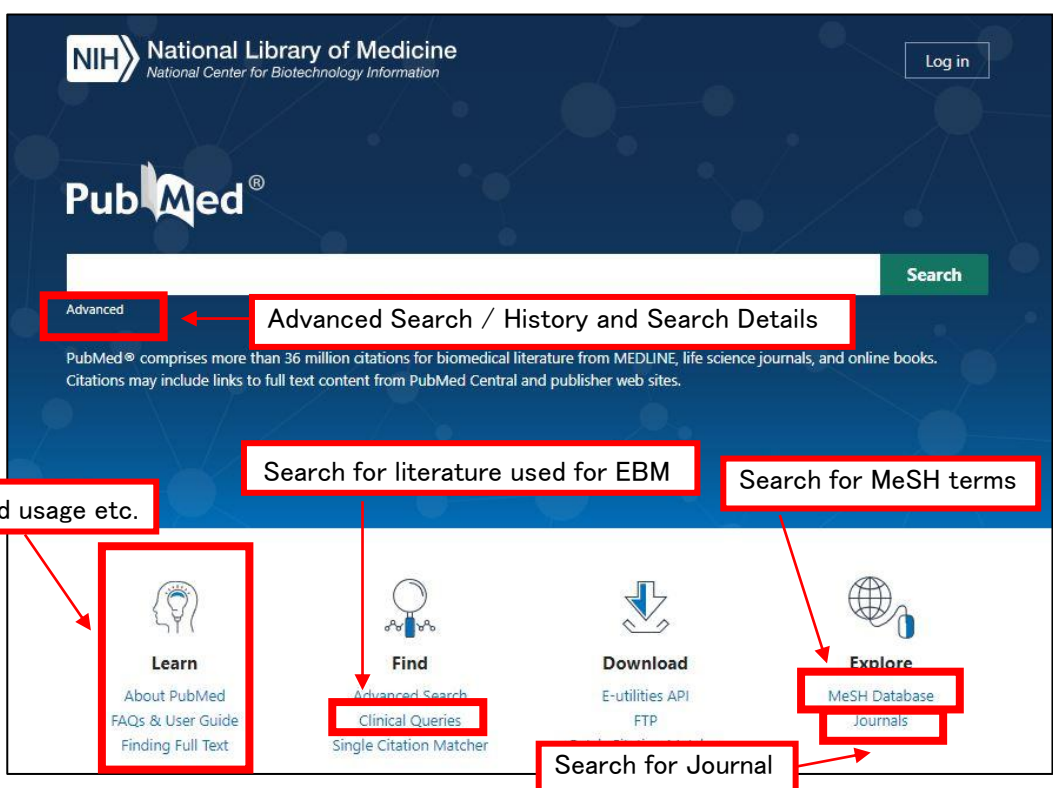

PubMed is a worldwide public database of medical and life science, published by the National Center for Biotechnology Information of the National Library of Medicine. In addition to all documents of the MEDLINE, it covers data prior to publication and document information in electronic format provided by medical publishers.

Keywords of MeSH (Medical Subject Headings) terms are given to the literature information. When performing a search via PubMed, entry terms are automatically mapped to the corresponding MeSH terms. For detailed information about MeSH, please refer to section <What is MeSH?> of the Guide Sheet 4-3E "[Let's Search MEDLINE \(EBSCOhost edition\) using MeSH](#)".

<How to access>

PubMed search screen => <https://www.ncbi.nlm.nih.gov/sites/entrez?otool=iijnagoulib>

*Dedicated URL for Nagoya University: NULink is available.

<Search order>

1. Enter search term and click [Search](#)
2. Search results will be displayed
3. Click on the article title to read Abstract

If you want to find the full text, click on to search for e-journal or the printed version

<Search Hints (logical operators)>

- The simplest way is to enter each search term separated by a space
- When search term consists of two or more words (search by phrase), use double quotations
Ex.: "avian influenza" (divide words by a space)
- When use logical operators (AND, OR, NOT), you can refine search more precisely
Ex.: Lung **OR** Laryngeal documents including *Lung* or *Laryngeal*
(Lung **OR** Laryngeal) **AND** Cancer documents including *Lung* or *Laryngeal* and *Cancer*
Lung **NOT** Laryngeal documents including *Lung*, but excluding *Laryngeal*

Abstract

Annotations: "Save citation to file, Email citation etc." points to the "Save", "Email", and "Send to" buttons. "Abbreviated title of published journal, year, volume, page" points to the citation information. "Link to e-journal" points to the "FULL TEXT LINKS" section, specifically the "BIOSIS LINK FULLTEXT ARTICLE" and "NULink FIND FULL TEXT" buttons. "NULink (NU Library information service) Check if e-journal or printed version is available in Nagoya University Library" points to the "NULink FIND FULL TEXT" button.

< Clinical Queries (literature search filter which can be used for EBM) >

Apply filters -- "Therapy", "Diagnosis" -- to your keywords in order to get the results related to clinical medicine more efficiently. For a limited time, you can also select a filter relative to COVID-19.

< Search Related Databases → EBSCOhost, Web of Science, ProQuest >

In EBSCO host, you can use MEDLINE as well as Cochrane Collection (information sources for EBM) etc. You can search multiple databases at once by using "Select Database".

Web of Science allows you to cross-search MEDLINE with Web of Science Core Collection (all fields), BIOSIS Citation Index (Life Science and Biomedical Research fields,) etc.
